ISNetworld RAVS Review Announcement

Calgary, Alberta – Trace Associates Inc. (Trace) is pleased to announce that we've completed registration and RAVS review for the ISNetworld Contractor and Supplier Management system (ISNetworld).

ISNetworld

ISNetworld collects self-reported conformance information from contractors, verifies its accuracy, and then reports the results in an easy-to-follow online format. This allows corporations to select those resources that best meet internal and governmental requirements, while providing contractors and suppliers the opportunity to centralize their conformance information, saving time and gaining presence in the marketplace.

What is RAVS?

ISNetworld's Review and Verification Services (RAVS) is the industry-leading provider of conformance verification. Self-reported health, safety and procurement related data is reviewed by subject matter experts who verify accuracy and validity.

President's Remarks

President, Darrell Haight states: "At Trace, health safety management is our number one priority and we deliver on that promise. From the first day we started this company we built our health and safety culture and management system to be world class. When clients and staff choose Trace, they can be assured that we are working hard to get everyone home safely, every night."

About Trace Associates Inc.

Founded in 2006, Trace is an employee-owned environmental consulting firm serving western and northern Canada. Trace's team of energetic professionals is capable of managing and efficiently completing all types of projects. We take pride in our enthusiasm, focus on safety, and client responsiveness.

Trace values its employees and provides a rewarding, collaborative, and secure working environment. At Trace, team members benefit from the opportunity to work on projects with renowned clients, take ownership in the company, and grow and develop their careers and skill sets within the firm.

Trace provides sustainable environmental consulting services to real estate, development, energy and industrial clients during all stages of the project life cycle (planning, construction, operation, decommissioning and redevelopment).
