Solutions and Highlights

- Proven experience
- Significant savings
- Flexible billing; no risk to client

Trace Associates Inc.'s proven process provides our clients with the best opportunity to reduce their solid waste and recycling expenditures, increasing their ongoing profitability.

Our Process

- Review current operations to develop an in-depth understanding of the client's unique waste and recycling service needs.
- Identify opportunities to reduce costs for any/all waste and recycling materials.
- Develop recommendations for the most cost-effective improvements currently available for each business location.
- Conduct an analysis of the expected savings, showing the expected financial impact of the recommendations.
- Present the new waste management plan for approval, so clients fully understand and support our recommendations.
- Implement the plan once approved, making the transition effortless for our clients.
- Monitor the plan for the length of the agreement, ensuring that the expected savings are being achieved.
- Provide monthly reports showing continuing results as a result of the implementation of the new waste management plan.
